NEW AIRPORT DIAGRAM FOR SARASOTA

Note: Taxiway D now open!!!

This diagram has not yet been incorporated into the most recent change for the Low Altitude Instrument Approach procedures.

AIRPORT SAFETY AND SECURITY

What protection do you have at your airport for your aircraft. If you declare an emergency, what sort of help will be waiting when you land? These seminars will provide information on how pilots and aircraft owners can enhance security for their aircraft at their local airport. It will also provide information on available emergency services at some local airports for the purpose of law enforcement, aircraft firefighting, and rescue support.

ATC PHRASEOLOGY

Bud Griner, Air Traffic Control Specialist at the Clearwater-St. Petersburg International Airport (PIE) tower, has been a regular participant in many safety seminars. In this program, he will cover some of the basic communications between pilots and air traffic controllers. It's a must for all pilots and will provide information designed to enhance communications and advance aviation safety.

NEVER AGAIN

The popular "Never Again" scenarios are a regular feature in each month's AOPA *Pilot* magazine, and contain the true life stories of pilots who managed a dangerous situation and learned a valuable lesson in the process. This program is one of the Seminar-In-A-Box series provided by the AOPA Air Safety Foundation for use by volunteer Aviation Safety Counselors (ASC) at local safety seminars. Dave Jochman, one of Tampa's newest ASC's, is an accomplished speaker and is a recognized Master CFI member of the National Association of Flight Instructors.
